1 Functionalities yet to add

- We were not able to add google login as functionality, but have added normal login and guest login.
- User can upload images and can choose radio-button for MCQ questions, but we are yet to add audio upload and different type of question format functionality.
- Currently, all forms created are kept public, functionality to make form private is yet to be implemented.
- User can fill his/her details in the sign-up section, but we are yet to implement update details functionality.
- User can view all open surveys in his/her dashboard but searching for a survey functionality is yet to implement.
- Restricting certain users to fill the form is not yet implemented.
- A survey can currently have a single contributor who can edit the survey and can view responses, multiple contributors functionality is not yet added.
